Javascript Validator

Use Online Javascript Validator to validate javascript code and find errors and warnings of your code that can be fixed. See real time code validation and fix errors and warnings of your code as you type. After coding is complete, format your javascript code.

```
1   /**********************************************************************/
2   /***                     CURRENT DATE                            ***/
3   /**********************************-*********************************/
4
5   /* The following Javascript was originally provided by Robin Drexler
6       (https://stackoverflow.com/questions/14245339/pre-populating-date-input-fie
7       for adding the current date to my input dat fields. */
8
9   (function () {
10      let currentDate = new Date().toISOString().substring(0, 10),
11          dateField1 = document.querySelector('#bookings-from-date'),
12          dateField2 = document.querySelector('#bookings-to-date');
13      dateField1.value = currentDate;
14      dateField2.value = currentDate;
15  })();
16
17
18  /**********************************************************************/
19  /***                         MAP                                 ***/
20  /**********************************-*********************************/
21
22  /* The following Javascript was originally written for and provided by the
23      Google Maps Platform Maps JavaScript API Guide and repurposed to aid in
24      the function and design of the map */
